nbc™
flexible solutions

NEI is one of the largest domestic bearing manufactures with the footprints across sectors. The company exports bearings to more than 20 countries and is also exporting to OEMs in Europe and USA.

NEI manufactures a wide range of bearings namely ball and cylindrical roller bearings, double row angular contact bearings, tapered roller bearings for automobiles, railways and industrial applications and large diameter bearings for steel plants and rolling mills. The three plants situated at Jaipur, Newai and Manesar manufacture these products with approx. 2300-strong team, supported by a well-equipped R&D with bearing life testing facility.

NEI Ltd. has been awarded the coveted 2010 Deming Application Prize, by the Union of Japanese Scientists and Engineers (JUPE), Japan, for achieving distinctive performance improvement through the application of Total Quality Management (TQM). The Deming medal confirms that our quality management systems are one of the best globally. For our customers, this means enjoying consistently superior products and assurance of highest quality for every NBC bearing they use.

R&D is equipped to introduce new technology in the field of bearings and related products. All functions from concept design to product launch are an integral part of R&D. The activity begins from customer interaction by Application Engineering and QFD approach is used to understand customer requirements to translate into a useful product. It has a full fledged test centre for endurance as well as application testing. The test lab is being expanded to double the capacity in next four years.

Advanced functions like Tribology, Simulation, Materials Technology and Lubrication technology have been added. The centre relies on the associate strength that has vast experience in the bearing industry. Academic excellence is being promoted by inclusion of specialists from IIT's and REC's. The centre will be a leading technology centre in next 4 to 5 years.

NEI stands committed to an endless journey of continuous improvement through TQM. Continuing on the tradition of providing high quality bearing to its customers; NBC has rolled out new brand identity with its New Logo.

The new logo is a representation of flexibility expressed through the letters 'nbc'. The letters are designed to appear flexible, mouldable, adjustable, and are complemented by our brand philosophy: 'flexible solutions'. It stands for the robust systems that have evolved over the years, to ensure our customers' delight, and their needs.

The color palette of Blue and Yellow has been retained for brand recognition. While the logo reiterates our commitment to partner with customers to help them achieve their goals today and in the future.

Summing up, our logo symbolizes everything we are striving for, while keeping our values intact and the brand promise of 'adapting to the dynamic requirements of customers by striving to provide bearings solutions and allied services'.

National Engineering Industries Ltd., part of the 150 year old, multi-billion dollar C.K. Birla group manufactures a wide range of bearings for automotive and railway industry as well as for general industrial applications under the brand name nbc. NEI, founded in the year 1946 as a pioneer industry in the field of bearing, manufacturing over 500 different sizes ranging from 6 mm bore to 1300 mm outer diameter having capability to manufacture bearing upto 2000 mm. diameter.
